

SEWAGE WATER DRAINAGE WITH BIOLOGICAL WASTE WATER TREATMENT PLANT

Technical description

Completed

- A PVC Ø 250 mm pipe on a length of 365 lm was inserted on the M8 - M4 section and up to the treatment plant;
- The waste water treatment plant has been introduced from the wastewater treatment plant to a Ø 80 mm pipe outlet for a 700 lm length for forced evacuation of treated water;
- A biological treatment plant that can serve 200 people was installed;
- The station purification system has been automated.

To be completed

- 645 meters of PVC Ø 250 mm pipeline;
- The capacity of the treatment plant can be extended to serve up to 2.000 people.

It will be integrated into the public domain.
